

Redaction Cloud

PRODUCT DATASHEET | SEPTEMBER 2026

Use the Redaction Studio review model as an online subscription service in a protected, professionally managed cloud environment.

BEST FOR

Distributed document teams that prefer a managed service over purchasing and operating standalone software.

DEPLOYMENT

Online SaaS hosted and managed with a trusted commercial cloud vendor. It is offered as a subscription service, not as standalone software to purchase.

WHAT IT DELIVERS

- Extends the controlled redaction workflow to authorised users without requiring each customer to operate the application stack.
- Combines OCR-assisted detection, page-level inspection and explicit reviewer approval in one managed workflow.
- Supports centralised service management while keeping final redaction authority with the customer's reviewers.
- Provides a practical route for organisations that need an online service and commercial hosting discipline.

CONTROLLED WORKFLOW

- Onboard. Establish the protected service environment, authorised users and operating rules.
- Process. Submit documents through the managed workflow for OCR-assisted redaction analysis.
- Review. Authorised reviewers inspect proposed redactions against the source page and make corrections.
- Complete. Finalise approved output within the managed service and follow the agreed delivery process.

TECHNICAL AND BUYER NOTES

SERVICE MODEL

Managed SaaS subscription; no standalone application purchase.

HOSTING

Protected commercial cloud environment with SOC 2 Type II controls and HIPAA-compliant hosting.

GOVERNANCE

Access, retention, data movement and support responsibilities are documented during onboarding.

HUMAN AUTHORITY

AI assistance does not replace the customer reviewer's approval of final redactions.

SCOPE NOTE

Hosting-provider identity and customer-specific cloud arrangements are disclosed during qualified security review, not on the public website.
